

CLAIM

The Panorama Side View Mirror Set

The Panorama Side View Mirror Set of flat mirrors will provide a superior image view of an object present in the side/rear sector beside the car on which installed superior to the image in any curved (concave or convex) mirror so located.

The driver can retain a peripheral view to the front of the car to note any traffic changes there while getting a mirror image view of the side/rear sector beside the car to note the presence of any vehicles or other obstructions.
